

SPRAYING AERIS DEFENCE

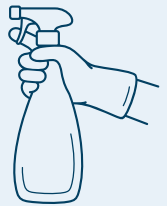

Direct spraying is a simple way to clean, disinfect and protect surfaces

Aeris Defence is a hospital grade disinfectant cleaner that is compatible with the vast majority of both natural and synthetic surfaces prone to microbial colonisation (germs on the surface). Aeris Defence helps long-term microbial control with its invisible protective film, ensuring your surface remains cleaner for longer.

1 PREPARE

- If Aeris Defence is already in 750ml spray container. It is ready to be used, all you need to do is twist the nozzle and spray onto surfaces as explained below.
- If Aeris Defence is in bulk containers, decant liquid into a suitable trigger spray bottle, ready for application.
- If Aeris Defence is in a flip top container, pour solution on to cloth.

2 CLEAN AND DISINFECT IN 1 STEP

- Apply Aeris Defence hospital grade disinfectant cleaner onto surface.
- Aeris Defence provides 2 in 1 step clean and disinfect. This means there is no need to pre-clean to attain optimal disinfection.
- Once Aeris Defence is sprayed onto the surface it can be wiped using paper towel or a microfibre cloth.
- This will provide the applied surface with ongoing protection from a range of bacteria and viruses (including COVID-19) for 7 days

Apply and keep wet on surface

TO DISINFECT

OR

Apply and leave wet or dry on surface

TO DISINFECT & PROTECT FOR 7 DAYS*

* Residual anti-bacterial for up to 7 days as tested against gram-negative E. coli & gram-positive S. Aureus. Residual COVID-19 kills for up to 7 days. 7 days protection if surface is not wiped with other liquids.

3 REPEAT

- Aeris Defence is a simple spray and wipe disinfectant with the added benefit of protecting surfaces for longer.
- Use on any hard surfaces throughout your workplace, including high touch surfaces like door handles, bench tops and taps.
